SUBJECT: Boiler Replacement Project  
Waupun Central Generating Plant, DFD Project #12C3M  
Availability of Final Environmental Assessment (FEA) and Recommendation

**To Whom It May Concern:**

The State of Wisconsin's Department of Administration, Division of Facilities Development retained GRAEF-USA to prepare an Environmental Assessment (EA) for the proposed Boiler Replacement Project, which will replace three coal-fired boilers within the Waupun Central Generating Plant in Waupun, Wisconsin. The EA is required by Wisconsin Administrative Code, Chapter DOC 335 in compliance with the Wisconsin Environmental Policy Act (WEPA). This letter notifies the public and interested parties that the EA is acceptable to the Wisconsin Department of Corrections, signifies the end of the planning process for the development of the project, and documents the decision of the Wisconsin Department of Corrections based on information contained in the Final EA.

The Final Environmental Assessment is available online at <http://notices.graef-usa.com/WaupunCGP> and <http://doc.wi.gov/about/data-and-research/budget-information> until June 30, 2013.

Sincerely,

**GRAEF-USA**
